**NUMBEO Quality of Life Index (higher is better)** is an estimation of overall quality of life by using empirical formula which takes into account purchasing power index (higher is better), pollution index (lower is better), house price to income ratio (lower is better), cost of living index (lower is better), safety index (higher is better), health care index (higher is better), traffic commute time index (lower is better) and climate index (higher is better). [www.numbeo.com](http://www.numbeo.com)

**NUMBEO Safety Index (higher is better)** is an estimation of overall level of safety in a given city or a country. [www.numbeo.com](http://www.numbeo.com)

**ACI Europe Airport Connectivity (higher is better)** is based on the SEO NetScan connectivity model, which measures airport connectivity in a more comprehensive way. It measures the number and quality of direct/non-stop connections as well as indirect connections via other airports. The NetScan model brings the most relevant connection components of every single market (frequency, travel time, connecting time) together into a single indicator: the Airport Connectivity Index.
